

## ADVANTAGES

- Small footprint
- Easily upgrade with air treatment options
- Suitable for harsh environments, excluding Offshore
- Option for weather protection
- Self-cleaning cartridge first stage filters with static second stage filters for higher efficiency and low pressure drop
- For dust/snow storm prone areas
- It offers maximum flexibility to adapt your filter solution to changing environmental/operational conditions
- Improves engine efficiency & availability with a wider selection of filters

<b>Application</b>	Arctic environments Desert environments, or areas prone to dust storms Harsh environments
<b>Installation Options</b>	Weather hoods (rain or snow) A droplet separator stage for mist & moisture protection A first stage cartridge pre-filter ; from M6-E12 efficiency A second stage static final filter; from F9 - H13 efficiency Other features can be added depending on the environment, such as an anti-icing/air inlet cooling system, trash or insect screens Can be supplied in painted carbon steel or stainless steel Can be supplied with our patented HemiPleat filters
<b>Comment</b>	Contact your nearest Camfil office for sizing, staging and configurations choice. Ask us for a Life Cycle Cost evaluation based on your site conditions and/or request an on-site evaluation of your site conditions to validate the required level of protection.
